2001 GORDON RESEARCH CONFERENCE

on Quantum Control of Atomic & Molecular Motion

FINAL PROGRESS REPORT

ONR

N00014-01-1-0102

The Gordon Research Conference (GRC) on Quantum Control of Atomic & Molecular Motion was held at Mount Holyoke, South Hadley, MA, July 29-August 3, 2001. The conference was well attended with 119 participants (list enclosed). The attendees represented the spectrum of endeavor in this field coming from academia, industry, and government laboratories, both US and foreign scientists, senior researchers, young investigators, and students.

In designing the formal speakers program, emphasis was placed on current unpublished research and discussion of the future target areas in this field. There was a conscious effort to stimulate lively discussion about the key issues in the field today. Time for formal presentations was limited in the interest of group discussions. In order that more scientists could communicate their most recent results, poster presentation time was scheduled. In addition to these formal interactions, "free time" was scheduled to allow informal discussions. Such discussions are fostering new collaborations and joint efforts in the field (program enclosed).

I want to personally thank you for your support of this Conference. As you know, in the interest of promoting the presentation of unpublished and frontier-breaking research, Gordon Research Conferences does not permit publication of meeting proceedings. If you wish any further details, please feel free to contact me. Thank you.
